

When Broadway was a cowpath

STURDY Dutch milch cows browsing in the “boueries”—that was Nieuw Amsterdam. Since then a great city burgeoned on the site. Since then pasteurization has been pioneered . . . tested herds have become standard . . . certified milk made available . . . vitamin D is added to provide the one scarce vitamin in Nature’s finest food.

Newest and finest development of Sheffield Farms’ 100-year history of leadership is Homogenized Vitamin D Milk. The softer curd achieved by homogenization is a boon to delicate stomachs. The richer taste makes it a delight to take.

SPECIALTY

Knowing how to get things done has been this country's specialty. The men and women associated with Eli Lilly and Company have the habit of constantly improving products, facilities, and operations in all departments of the business. On this happy faculty depends the excellence of Lilly products.

FOR PROLONGED EFFECT Protamine, Zinc & Iletin (Insulin, Lilly)

The outstanding advantage of Protamine, Zinc & Iletin (Insulin, Lilly) is its prolonged blood-sugar-lowering effect, lasting at least twenty-four hours. Use of Protamine Zinc Insulin in selected cases of diabetes permits a reduction in the number of injections required daily and corrects the nocturnal hyperglycemia common in severe cases, thus bringing patients another step closer to normal living.

*Physiologic
Basis of*
**DIURETIC
THERAPY**

When the glomerular and tubular functions of the kidneys become impaired, alterations in the mechanism of urinary secretion occur. Often there results

a retention of water with generalized edema. In such cases it is believed that Salyrgan-Theophylline lowers tubular reabsorption and thus permits the excretion of water and salt.

Salyrgan-Theophylline is extensively employed in the treatment of cardiac and cardiorenal edema as well as dropsy of nephrosis. It can usually be administered periodically without loss of potency.

Salyrgan-Theophylline is injected intravenously or intramuscularly.

Carrel's immortal chicken-tissue serves research at Lederle Laboratories—

It was in 1912 that DR. ALEXIS CARREL put this bit of chick embryo heart into a nutrient and made it grow. Every 48 hours since then it has doubled. If it had been feasible to multiply the tissues to their greatest possible extent, today their mass would be bigger than the solar system. When DR. CARREL retired, the strain was brought to Lederle, where it lives on in the right environment. Here cultures from it serve as standards for studying the growth of certain viruses. And it is a useful tool for measuring antiseptic values. Indeed research has put immortality to work!

Tissue culture has become a productive art and the control of 65 virus diseases of man or beast is a proper task for research in the world's largest immunological establishment. Four buildings (out of 67) are devoted to viruses—the two largest are used entirely for research.

Why are 54% of our customers sent to us by doctors?

● It may seem surprising that 54% of our customers have come to us on their doctors' recommendations. Surprising, that is, until you consider the facts.

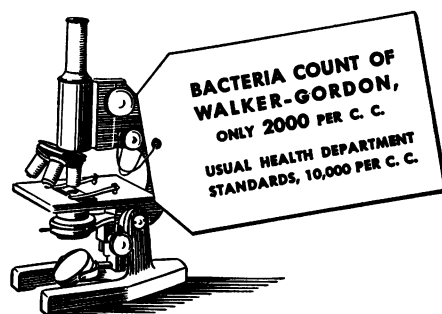

After all, the extraordinary purity precautions taken on our "clinically controlled" farms are well known to the medical profession. For example, Walker-Gordon cows are given *daily* health checks, instead of semi-annual.

Too, their udders are washed, and dried with sterilized towels, before each milking. And instead of being milked by hand, they're milked on the famous "Rotolactor"

... an exclusive Walker-Gordon development. Walker-Gordon Milk actually goes from cow to consumer without coming in contact with the outside air!

All of which helps explain why Walker-Gordon Milk is *five times as pure*, bacterially, as health departments require even under the high standards set for certified milk.

BACTERIA COUNT OF
WALKER-GORDON,
ONLY 2000 PER C. C.
USUAL HEALTH DEPARTMENT
STANDARDS, 10,000 PER C. C.

... And all of which helps explain, too, why Walker-Gordon is so widely recognized and recommended by doctors as *the world's finest milk*.

Walker-Gordon Certified Milk

THE WORLD'S FINEST MILK

Available either unheated, pasteurized, or homogenized

"IS THIS PRODUCT COUNCIL-ACCEPTED?"

This is the first question many physicians ask the detail man, when a new product is presented.

MEAD PRODUCTS, COUNCIL-ON-PHARMACY ACCEPTED:

Mead's Oleum Percomorphum (liquid and capsules); Mead's Cod Liver Oil Fortified With Percomorph Liver Oil; Mead's Viosterol in Halibut Liver Oil (liquid and capsules); Mead's Cod Liver Oil With Viosterol; Mead's Viosterol in Oil; Mead's Standardized Cod Liver Oil; Mead's Halibut Liver Oil.

MEAD PRODUCTS, COUNCIL-ON-FOODS ACCEPTED:

Dextri-Maltose Nos. 1, 2, & 3; Dextri-Maltose With Extracts of Wheat Embryo and Yeast (formerly Dextri-Maltose With Vitamin B); Pablum; Mead's Cereal; Mead's Brewers Yeast (powder and tablets); Mead's Powdered Protein Milk; Mead's Powdered Lactic Acid Milk Nos. 1 and 2; Alacta; Casec; Sobee; Cemac; Recolac.

ALL MEAD PRODUCTS
ARE COUNCIL-ACCEPTED

If the detail man answers, "No," the doctor saves time by saying, "Come around again when the Council accepts your product."

If the detail man answers, "Yes," the doctor knows that the composition of the product has been carefully verified, and that members of the Council have scrutinized the label, weighed the evidence, checked the claims, and agreed that the product merits the confidence of the physician. The doctor can ask his own questions, and make his own decision about using the product, but not only has he saved himself a vast amount of time but he has derived the benefit of a fearless, expert, fact-finding body whose sole purpose is to protect him and his patient.

No one physician, even if he were qualified, could afford to devote so much time and study to every new product. His Council renders this service for him, freely. Nowhere else in the world is there a group that performs the functions so ably served by the Council on Pharmacy and Chemistry and the Council on Foods.

Mead Johnson & Company cooperates with both Councils, not because we have to but because we want to. Our detail men can always answer: "Yes, this Mead Product is Council-Accepted."

POMEROY surgical appliances are sold on prescription and are obtainable only at POMEROY shops. This guarantees correct fit, comfort, and lasting satisfaction to both physician and patient.

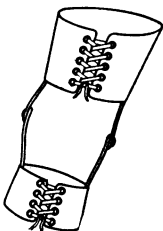

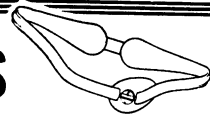

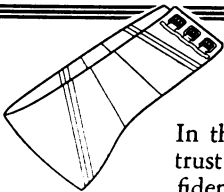

SURGICAL APPLIANCES

In the matter of surgical appliances the patient must trust his physician and the physician must have confidence in the dealer. For more than seventy years POMEROY has been designing and making surgical appliances to conform to the physician's specifications and fitting them to meet the particular requirements of the individual patient.

In specifying POMEROY the physician assures his patient correct design, fit and lasting comfort.

A PIONEER VITAMIN B COMPLEX

*Dependable And Economical
For Regular Use*

Vitamin research in nutrition and medicine discovered the high vitamin B, then the vitamin B complex potency of Vegex. It is comparable with grain grown dried brewers yeast—the richest known source—in the whole of the vitamin B complex. Whatever the need or desire for high concentration, the natural vitamin B complex has not been concentrated into a more potent form than brewers yeast nor Vegex, the condensed autolyzed extract of brewers yeast.

The value of Vegex has been well established in the treatment of beriberi, pellagra (it is a potent, natural source of nicotinic acid), alcoholic polyneuritis; for supplying the B vitamins in lactation promotion and child growth. There have been over sixty published reports in medical literature on the successful use of Vegex for the extrinsic factor in the anemias.

Tasty-Flavor—Easily Borne

Vegex has a meat-like flavor. It enhances the flavor of meat and vegetable dishes, soups, etc.

Vegex is so easily borne that it is regularly prescribed for infants, in post-operative cases as well as for general vitamin B complex reinforcement. It is particularly useful in liquid or other restricted diets.

Simple Uses

The tasty flavor of Vegex is best appreciated when it is used as directed—diluted and in small quantities. It is a condensed extract of brewers yeast and the flavor is concentrated.

Vegex may be added to the diet in a variety of ways, a few of which are as follows:

Vegex Bouillon

From one-half to a level teaspoonful of Vegex to a cup of hot water or the water in which vegetables were cooked.

Chilled Vegex

Add a dash of lemon to Vegex bouillon and thoroughly chill.

Vegex-Tomato Juice Cocktail

Dissolve from one-half to a level teaspoonful of Vegex in a little warm water and add to a glass of chilled tomato juice.

Vegex-Milk

Add one-half teaspoonful of Vegex to a cup of hot milk.

Vegex Butter

Cream together one part of Vegex with ten or twelve parts of butter for sandwiches, toast or baked potato.

Vegex with Vegetables or Meats

After broiling or roasting, spread a little Vegex to taste on steaks, chops; mix with vegetables, macaroni, etc.

Samples for clinical or professional use will be sent on request.

COLUMBIA UNIVERSITY PRESS

THE INSTRUMENT OF THE CARDIOLOGIST

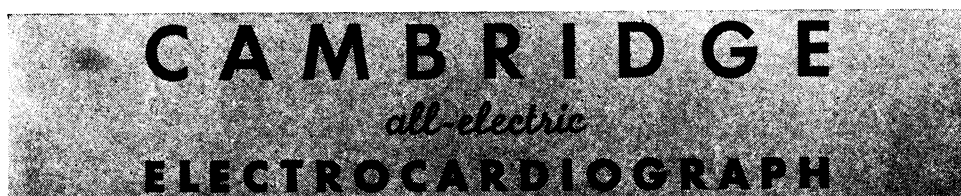

There is no substitute for the Cambridge Electrocardiograph. The discriminating Cardiologist uses it in his own practice; he wants it in his hospital. He can afford no less to augment or verify clinical evidence. He requires an instrument that is not only accurate, rugged and dependable but one that provides records which are accepted throughout the world as the standard of comparison . . . in short a *Cambridge-built* instrument.

Cambridge invites all visiting Doctors to our showrooms in Grand Central Terminal, where all models of Cambridge Electrocardiographs and Electrocardiograph - Stethographs, together with the new Cambridge Continuous Recording Blood Pressure Apparatus will be gladly demonstrated.

CAMBRIDGE INSTRUMENT COMPANY, INC.

3734 Grand Central Terminal, New York, N. Y.

Pioneer Manufacturers of the Electrocardiograph

WHICH SHALL IT BE ?

A CHIP OFF THE

OR THE ENTIRE

The diagnosis of moderate vitamin B deficiency is still too involved with difficulty for practical purposes. The patient who complains of vague symptoms of undue fatigue, nervousness, headache, who has no desire for food, suffers from intestinal discomfort and constipation, may not be obtaining a sufficient quantity of any one or combination of factors that constitute the Vitamin B Complex. To use a single component of vitamin B may be but a part-way measure in reaching the therapeutic goal.

BREWERS' YEAST (HARRIS)

supplies, *in their natural relationship*, all the factors of the Vitamin B Complex: thiamine, riboflavin, nicotinic acid, pyridoxine, pantothenic acid, factor W and the six other factors described as components of the Vitamin B Complex. Brewers' Yeast (Harris) takes the conjecture out of vitamin B medication, as far as practicable. A trial supply gladly sent on request.

Brewers' Yeast (Harris) is available in palatable powder form and in 7½-grain blocks, in 6 and 13 ounce and 5 pound tins; blocks also supplied in bottles of 100. Vitamin B Complex Syrup in bottles of ¼, ½, and 1 pound. For specific medication, tablets of thiamine hydrochloride, riboflavin, nicotinic acid, ascorbic acid, in customary doses.
